R. P. Wetmore, of 334 C Street north-

west, recently wrote to the Major and Superintendent of Police in behalf of Dr. Lee Chech Hoy, of Mott Street, New York, a Christian Chinaman, asking per-mission for the latter to preach to his

countrymen on the streets in Washing-ton. Mr. Wetmore stated that a point

on Four-and-a-Half Street between Mis-souri and Pennsylvania Avenues was pre-

application informs the Commissioners that no permits for the purpose named are issued, but he states that the lieutenant of the Sixth precinct is of the opinion that the preaching might be allowed on Fourth Street, south of the alley, between Missouri and Pennsylvania Avenues.

The Commissioners have been informed that the order was not issued at the request of the District military authorities, and it is believed that it was forwarded probably for the purpose of calling attention to the carnival.

Acting upon the recommendation of Major Sylvester the Commissioners yes-terday appointed Karl Schupach as addi-

tional private for duty in and about the

Washington Brewing Company's premiser

bounded by Fourth, Fifth, E, and F Streets northeast. This action was taken at the instance of Harry Williams, man-ager of the brewery.

The Commissioners have approved the

recommendation of the Inspector of Plumbing that the request of Mrs. Mary

McCauly, of 215 Second Street southwest, be granted and that she be given permis-

sion to connect two houses on Second

Street with one sewer and water service.

The Inspector stated that the houses in question are small frame houses and temporary in character, and in his opin-ion, their removal would be only a ques-tion of a short time.

The Superintendent of the Water De-

partment has forwarded to the Commis

sioners a recommendation that in equip-ping the Trumbull Street pumping station

provision be made for a new water end for the 5,00,000-gallon engine now in ser-vice at the U Street station. He also sub-mits forms of advertisement and specifi-cations for the purchase of the same.

Acting upon the recommendation of the Inspector of Plumbing, the Commission-ers have voted to grant the request of S.

S. Shedd & Broa. for permission to con-nect the building of the Schlitz Brewing Company with the main sewer. The in-spector recommended that a connection be made to the main sewer at a new point and that the running trap be omitted.

At the instance of the Computing En gineer, the Commissioners have informed

J. J. Glennan, of 509 Second Street north-

west, that steps are being taken to secure the removal of the abandoned street rail-road tracks on Second Street southwest, and for the improvement of the street.

STRANGE WILL PREAMBLE.

A. C. MacKnight Retrieves Fortune

by Economy and Self-Sacrifice. The will of Arthur C. MacKnight, who

died July 20 last, which was filed yester day for probute, is prefuced as follows:

"The comfortable fortune I once pos-sessed of \$150,000 or more, I was deliber-

ately robbed of by designing scoundrels and knaves, and a fair competency I lost through foolish investments. But 'the

past is past redeeming,' so I will placidly accept matters as they are, without com-

plaint, for lamentation would avail m

"I have economized steadily in later

years in order to make ends meet and

save what little remained, and yet those

sider the sacrifices I have made in order

that I might leave something behind for

The will, which is dated January 1, 1991,

The testator directs the following dis-

To his brother, John W. MacKnight, of

New York city, and his son, W. H. Mac-Knight, the proceeds of his life insur-ance in the New York Life Insurance

Company, two-thirds to the former and one-third to the latter; to his sisters, Mrs. MacKnight Moses and Mrs. D. W. Hough-

ton, and his nephew, A. C. MacKnight Moses, all of this city, in equal shares,

the proceeds of his life insurance in the Northwestern Mutual Life Insurance

HOUSING TROPICAL PLANTS

Caring for the Government's Ten. der Shrubs During the Winter.

Interesting Work at the Propagat. ing Gardens-Planning a Chrysanthemum Show-Putting Out Pan ales for the Public Reservations.

The War Department, through the Su perintendent of Public Buildings and Grounds, Col. T. A. Bingham, is making extensive improvements in the propaga-ting gardens south of the White Lot, where tender tropical and semi-tropical plants which have graced the larger city parks during the summer are being housed for the winter months. The preparations for their accommodation are most extensive, as are all of the improvements being put into use at the national green-houses just west of the Bureau of Engraving and Printing.

Driveways and walks have been laid out artistically, new greenhouses built, and a new office building erected, while the contemplated changes in the topograof the five-acre enclosure devoted to the propagating gardens of the Government, which will be put into use as soon sible, will make the spot one of the most beautiful parks in the city, if not in the whole country. The improvements already made have greatly enhanced the value of the gardens artistically.

The greenhouse plant has just been increased by the erection of a new plant house, 130 by 20 feet in length. One of the large palm houses has been remodeled and enlarged, which will largely increase the facilities for the storage of translations. the facilities for the storage of tropical plants, which are unable to stand the rigors of a Washington winter.

A new flogstaff, ninety feet high, has been erected in the grounds at the intersection of two proposed roadways, and the American flag will hereafter fly from the

The general plans for the beautification of the gardens and increase in facilities of the institution will be put into operation as rapidly as appropriations to cover the expense are made by Congress. A iberal appropriation was made by the last Congress, and in consequence the improvements now under way are more ex-tensive than for many years past. Work has now commenced at the propa-

gating gardens for the propagation of plants for the various city parks which cared for by the Department of Publie Buildings and Grounds. The start in next season's plants was made this week. Large quantities of assorted plants are being grown. Next year there will be nearly 1,000,000 plants blooming in the parks of the city. There will be many arieties of foliage and flowering plants. never yet been seen in Washington. The parks of the city next year, it is ex-pected, will be the most beautiful and attractive in the history of the National

There are in the city 302 public reservations, with an aggregate extent of 4,07 acres. Of these, 105 reservations, comprising 253 acres in extent, are highly improved; 53, comprising 23 acres, are partially improved, while 143 reservations,

ext year twenty-five improved parks will be added to the already large number. The improvements are now in progress, and the parks will be laid out next month. These are small, and are usually triangles at the intersection of streets and avenues, which have heretofore been scarcely more than eyesores. All will be improved and beautified before July 1 of next year. The improve-ments will consist in the laying of drainage and sewer pipes, as well as horticul-tural changes which will be made.

Colonel Bingham will also direct during he coming season the setting out of nany trees on the various reclaimed tions of the District.

At the propagating gardens south of the t, what is probably the most ats in the country is in charge of George H. Brown, landscape gardener of the Department of Public Buildings and any other man in the United States. He has conducted experiments with plants, many of which have been highly success ful and satisfactory, which have resulted in securing a number of odd and beautiful plants and flowers which next summer will beautify the parks of the Capital.

Among the strange plants which have been grown under glass at the gardens, in tropically heated houses, is a specimen of an odd plant, the seeds of which were brought from Santlago, Cuba, by a soldier who took part in the Spanish-Ameri-can War. The plant is known as the loquet, a species of Japanese plum, al-though the soldier did not know either the local or botanical name. At the propagating gardens the botanical name given it is eriobatyra Japonica. It unique looking plant, six feet in height. sperintendent Brown is looking forward with great interest to the time when it shall bear. In addition to this there are nearly twenty-five other varieties of

sometimes scarlet and again pink. It one of the most interesting plants in the collection. The Holy Ghost, another odd plant, a species of orchid, the flower of which resembles a white dove resting

ing plants grown in the hothouses.

What is probably the most curious plant to be seen in the Government green-houses is the aculypha sanderii, a native of the Philippines and China, a recent acquisition, which will be used after New Year at the public receptions at the Executive Mansion, where it will no doubt create a sensation. The leaves of the plant are distinctive and beautiful, but

upon a book, is one of the many interest-

the crowning glory, the feature which will attract the attention of all who see it, is the long crimson panacles wich in a cluster from the crown of foliage and droop in brilliant tassels through the leaves, sometimes below the pot in which the plant is grown.

Some of these plants are now in bloom

at the propagating garden greenhouses but a large number are being reserved for decorative uses at the White House.

for decorative uses at the White House. The blooms are cut off each day as they appear, in order that they may bloom profusely after January 1.

In one of the greenhouses is the largest collection of crotons, the plant from which croton oil is made, in the country. The fame of the collection, which is really a great one, is better known abroad than in Washington, where the average person does not realize the value and extent of

in Washington, where the average person does not realize the value and extent of the Government collection of plants at the national gardens here.

The superintendent of the propagating gardens, Mr. Brown, is now ready to plant 25,000 pansies in the public parks. The work will be begun early next week. The pansies are hardy, and bloom early. Among them are a number of new varieties, one particularly, a scarlet flower, which will not be seen in Washington until they appear in the flower beds of the parks.

More than 8,000 chrysanthemums have

the parks.

More than 8,000 chrysanthemums have been planted. The work of planting this flower will be completed by next week. They will fill a certain number of beds. Following the chrysanthemums pansies will be planted. They will remain out all winter and bloom early in the spring. Pansies will be followed in planting by tulips and crocus. More than 50,00 builts are on hand. They will be set out by the end of October.

nd of October. The collection of chrysanthemums at end of October.

The collection of chrysanthemums at the propagating gardens is one of the largest and most valuable in the United States. It comprises more than forty different varieties, and aggregates 12,000 separate plants. A number of these are new, having never before been seen in Washington, while the commoner varieties have been eliminated. Each of the forty different kinds represents something definite in chrysanthemum growing. The collection is a source of much pride to the superintendent of the gardens.

Preparations are now being made for a manmont chrysanthemum show of the Government plants, which will be held at the gardens early in November.

Already the exhibition is assured of success. The "show" will be the largest of the kind ever given in Washington, and it is expected that it will attract the attention of flower lovers in large numbers.

bers.
Among the plants and flowers which will Among the plants and flowers which will be seen in the parks next summer will be several new varieties of shrobs and showy hadding plants, of which the pepper plant, now under glass at the greenhouses, will easily be the most attractive. The pepper berries, upon the same growth are of various colors white, red, and purple, and its appearance in the flower beds of the public parks will be halled with delight by all lovers of growing things.

A new lily, having the appearance of the Easter lily, has been obtained recently by Superintendent Brown, from a cross between two varieties. It will be used at the White House for Easter decorations.

A new variety of hardy purple aster will be seen for the first time next summer in the parks, experiments with it at the propagating gardens having proved highly successful. A number of other shrubs, evergreens, and tropical paims will also be used in the decorative scheme in the applie reservations emerging in in the public reservations, especially in the larger parks, next season.

OBJECTIONS TO A RAILWAY.

An Injunction Asked to Restrain the Contractors From Building.

A petition was filed in the Suprer Court of the District yesterday by S. S. Daish & Sons, asking that a writ of in-junction be issued against Warren F. Brenizer and his employes to restrain them from constructing and maintain ing a railway or tramway across Florida Avenue, between First Street cast and Fourth Street east, during the pendency of these proceedings. The petitioners also ask that in the event dens, who is not only a valued assistant to Colonei Bingham, but an expert who probably knows more about plants than any other man to the Colonei Bingham, but an expert who probably knows more about plants than any other man to the Colonei Bingham, but an expert who probably knows more about plants than any other man to the Colonei Bingham, but an expert who probably knows more about plants than any other man to the Colonei Bingham, but an expert who probably knows more about plants of the gar-should have already been constructed, a mandatory injunction be issued against the defendant directing him to remove it. the defendant directing him to remove it.

The complainants state that they are informed and believe that on August 14, last, the defendant entered into a contract with the Commissioners of the District for the grading and regulating of Third Street east from Florida Avenue to H Street north. It is also stated that they requested the Commissioners to allow them to see the original or a copy of the contract but that the privilege was denied them.

It is further stated by the complainants that the construction of the railway or tramway referred to will greatly interfere with the conduct of their business, at the corner Florida Avenue and Brentwood Boad, John Ridout is named as coursel for the complainants.

HAND WANGLED IN A MACHINE

HAND MANGLED IN A MACHINE A Cabinet Maker Seriously Injured While at Work.

Robert C. Watts, a cabinet maker, emhad his left hand seriously managed yet terday morning at the planing mill of Belt & Dyer, corner of Thirteenth and C and to impede traffic.

Questions Raised Relative to Approaches to a Bank Site.

A Proposed Improvement Near the New Public Library-Widening of a Sidewalk on P Street-Plumbing

The Commissioners have received a letter from Hamilton & Colbert in which several questions are raised with refer-ence to a building which the Home Savings Bank proposes to erect on lot 4, in the square west of square 484. The site is at the intersection of Massachusetts Avenue and K Street northwest, just east of Seventh Street. It fronts on a triangular public space from which it is sep-arated by a coment sidewalk twelve feet

the wish of the bank to have two towers upon its building with the usual projeclons. They also call attention to the wagon stand now maintained on the right of the public space referred to, denominating it a nuisance to all the contiguous property, and the attorneys desire to know whether this wagon stand cannot be

Public Library.

The attorneys state that their purpose in adressing the Commissioners is to obtain an expression of opinion upon the points raised before making formal application for permits. The letter has been referred to the Inspector of Buildings for consideration and report.

Several weeks ago Charles B. Ball, the Commissioners a schedule of the propo-sals received for the installation of the fixtures in the Birney School building. Mr. Ball recommended that the contract be awarded to M. B. Casey, except the closet fixtures, for which he recommended that the proposal of J. W. Swainson be

the Inspector of Buildings offered a statement that the sum of \$1,588 was available for the purpose, and that as the cost as represented in the Casey bid would exceed \$1,000, he was obliged to submit the matter a second time to the Commissioner

The Inspector of Plumbing, after considering the matter a second time, re-iterated his recommendations that the

iterated his recommendations that the supplemental bid required an expenditure of only \$350, which he also asked to have authorized.

The Engineer Commissioner yesterday forwarded the papers to his associates approved, and recommended that the contractors be informed that the placing of name plates upon the plumbing, to indicate the person who had done the work, could not be allowed.

Dr. W. W. Baker, of 1841 North Capitol Street, recently addressed the Commis-sioners complaining of the delay in laying the pavement on North Capitol Street be tween R and T Streets. He also regis-tered complaint against the present condition of the roadway and of the gutters the corner of T Street and Lincoln Avenue. The matters complained of were re-ferred to the Surface Division of the En-

Avenue northwest, recently wrote to the Commissioners, requesting that steps be taken immediately to secure the removal lana Avenue, between Ninth and Tenth Streets northwest. The writers state that ployed by Hutchinson & Harban, mantle the tracks in question have long been makers, at 211 Twelfth Street northwest, had his left hand seriously mangled yes-

AFFAIRS OF THE DISTRICT The protest was referred to the Surface

After calling attention to these facts the attorneys say that the building to be erected will front on Seventh Street; or, more strictly speaking, upon the space above described. By reason of the distance of the building from Seventh Street the atttorneys think that the approach is an impracticable one. They therefore ask whether the walk may not be widened to foot driving way may not be maintained west of and adjoining this sidewalk, an arrangement they say similar to that created in front of the Central National

removed to some other part of the city. Hamilton & Colbert call attention to the peculiar surroundings of this lot, which make it impracticable of improvement except in some such way as suggested, and they are of the opinion that the present conditions will continue unless the bank improves the lot. They state that it will be unfortunate for these conditions to continue after the completion of the new Public Library.

The attorneys state that their nurnose

gineer Department, and C. B. Hunt, the Computing Engineer, has now reported:

"The writer refers to the paying of the

street railway tracks on Louis-Houghton, Hattic Houghton Roach, Flora MacKnight Bedell, and Jennie MacKnight Mosure; to his niece, Fannie Mosses Gosling, \$421; to his nephew, J. Albert Houghton, two-thirds of the proceeds of policy No. 441,571 in the Northwestern Mutual Life Insurance Company, and to his mother, the remaining one-third; to Charles H. Bowen, of Waukeehaw, Wis, the proceeds of policy No. 15,758 in the Washington Life Insurance Company; to his nephew, Harry C. Moses, some diamonds and jewelry; to his nephew, Arthur C. MacKnight Moses, books and jewelry; to Mrs MacKnight Moses, the testator's sister, pictures, bric-a-brac, books, and paintings; to his nicce, Fannie M. Gosling, Jewelry.

Cuben plants, while there are several new ones from the Philippine Islands and the East.

The Spanish-American War has resulted in the acquisition of many new yarleties of flowers and tro-m. These are being studied at the propagating gardens with a view to introducing them in the public parks and the lawns of departments, if suited to such purposes.

Another odd plant from Cuba, which grows on walls and trees, is the till-andsia, which has many long, hard, dry, pale green leaves, and a beautiful flower,

THE CURE OF CONSUMPTION Division, and ofter investigation and re-port, Capt. H. C. Newcomer, Acting En-gineer Commissioner, forwarded the same to his associates, with the statement that

AND ASTHMA

the existing sidewalk at the point de-scribed is badly worn and rough. Ho thinks that ft is quite unfit for the promi-nent locality in which it is. Under the circumstances, he recommends that the protest be ignored, and that the work proceed as ordered. INHALATION

THE TWO DRS. KOCH

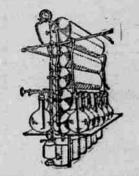

The Commissioners have received a notification from the adjutant general AND THEIR GREAT GERMAN DISof Virginia granting permission to mili-tary organizations to pass through the **COVERIES AND INVENTIONS.** State to attend the carnival at Richmond

Several years ago Dr. Robert Koch per-ected his tuberculine medicine for cure

by injection it succeeded only to a limited extent.

Two years later the wonderful Inhalation Machine for the vaporizing of heating oils combined with this Koch Tuberculine was invented and imported into this country by Dr. Edward Koch. By the use of this invention oily vapors, combined with the tuberculine medicines, are brought directly to the lungs at the seat of the disease, and thousands of people have testified to being cured. Since these two systems have been under the direct control of Dr. Edward Koch.

The two doctors are typical Germans and are modest and retiring, and while Dr. Edward Koch has by his wonderful Inhalation Machine brought this remedy to a successful issue, yet it must not be forgotten that Dr. Robert Koch was the discoverer of the remedy (called the Tuberculine) which Dr. Edward Koch uses in his apparatus, as here shown. This apparatus throws the Tuberculine into the

Washington office at 627 E Street northwest.

He and his cousin, Robert, have spent
a lifetime in the trentment and cure of
